

KS3

PLASTIC

- What is Plastic?
- Why was it invented?
- Should we still be using it?
- Could we manage without it?
- Is it good or bad for the environment?

Create a project on plastic, use twinkl and the questions above to help you. Give evidence for your opinions and come up with ideas to help improve the global plastic pollution crisis in a small way.

Keep a diary of when you use plastic! (in the time I was working on this I used, a pen, laptop, remote control for TV, mayonnaise squeeze bottle for my sandwich, ham packaging, butter tub, and a squash bottle!)

Create an argument to debate the use of plastic. Which side do you agree with?

Looking forward to seeing your ideas!
